

ArteraAI Prostate Test

ArteraAI Prostate Test

Patients diagnosed with localized prostate cancer are faced with many treatment options and uncertainty about what is right for them.

Based on individual patient characteristics, the ArteraAI Prostate Test can provide insight into the following:

- Risk of developing distant metastasis
- Risk of prostate cancer-specific mortality
- Active surveillance as a suitable option^a
- Abiraterone (adjunctive therapy) as a suitable option^c
- Benefit of adding hormone therapy to radiation therapy^b

The ArteraAI Prostate Test can help determine the best cancer treatment plan.

^aFor patients with NCCN very low-, low-, or favorable-intermediate risk.

^bFor patients with NCCN intermediate-risk.

^cFor patients with NCCN very high-, high-risk.

Test Benefits

Recommended in National Guidelines

Fast Turnaround with no Additional Procedures

Low Out-of-Pocket Costs (\$0 for Medicare)

How to Order

1.

Physician orders the test.
